

WMK

WELTWEITE MANUFAKTUR VON KÜCHENWAREN

KITCHENWARE

WMK PLATINUM EDITION

All products of the WMK Platinum Edition are made of satin finished SS 10/18. Depending on the version, we have chosen a wall thickness of 0.6 mm to 1.2 mm to meet the highest professional requirements. All products in this series have a fully induction-welded aluminum sandwich bottom. This consists of an aluminum layer and a final bottom plate made of SS 0/18, which was pressed after welding under 2500t.

This procedure of production guarantees optimal heat distribution on the bottom of the pot. This heats up the cookware of WMK Platinum Edition very evenly and quickly. Therefore a detachment of the bottom is impossible.

All handles are welded with up to ten points and do not take on the heat of the pot body.

The used materials guarantee longevity, acid resistance and easy cleaning.

Of course, a use on all types of stoves, including induction, is possible.

Stew pan high

- with lid

PROGRESS AND DEVELOPMENT

- 1 Non-stick surface finish. Non-stick coating layer, Made from our unique lotan® sealing with antibacterial effect.
- 2 Reinforced layer. Reinforced layer, fortified With mineral particles to provide a long lasting Abrasion resistance.
- 3 Anti-corrosion layer. Anti-corrosion layer for Optimal protection against aggressive detergents, Fruit acids and acetic.
- 4 Titanium oxide layer. Titanium oxide layer nearly As hard as diamond, burned on at 20.000 °C, Extremely scratch and cut resistant.
- 5 Heavy duty handcasted aluminum. Abrasive Blasting enhances the surface area 12 times better, enabling superior adhesion for the subsequent Layers.

Lotan® is the new revolutionary coating technology for modern gastronormic applications.

The non-stick characteristics of our Lotan® coating simplify the cleaning of your cookware and keep the surface germ free.

Our Lotan® coating makes our cookware so easy to rinse that it helps reduce your water consumption, which therefore helps save one of our planets most precious natural resources – water and your hard earned money.

HACCP Cutting boards

All WMK cutting boards are made of extremely hard polyethylene HDPE plastic, which minimizes wear off, such as cuts. Accordingly, these cutting boards must be less planed and are more durable. Cleaning in dishwashers is no problem. All cutting boards can be used on both sides.

One side has a juice groove, while the second side is completely smooth.

Color coding according to HACCP.

HACCP cutting board GN 1/1

- 530 x 325 mm
- 20 mm thickness
